

Maurice Feld

updated: 2023-09-12

Curriculum Vitae - IT related

Personalia

Name	Maurice Feld
Address	Verlengde Geestweg 13
Postal code	1861 VC
City	Bergen (NH)
Phone	+31 6 294 786 34
E-mail	maurice@MoreEaze.com
Gender	man
Marital status	widower
Year of birth	1976
Nationality	Dutch
Driving license	√ B

Note:

This is mijn IT-related CV. It does not contain my music related CV, which can be found here: http://bit.ly/Maurice_CV_Music

Deployable as

Front-end web developer, **JavaScript**, **TypeScript (!)**, **Angular** or **React** developer.

Max 4 days a week (32 hours max - I have one day of other smaller projects). Hybrid or fully remote. Ideally max 1 day at office & max 1 hour traveling time from Bergen (NH).

USPs:

- Write clean future proof code
- Take ownership / leader
- Team player
- Ambitious
- Organized & structured
- DISC-profile: D-I

Searching for:

- FE TypeScript role in which I can grow as a developer

Technical:

- Front-end only
- TypeScript is a must
- Angular or React would leverage my expertise most

Company:

- Team size: not too small
- Team with at least 1 other Front-ender 'at level'
- Preferably working on a product that adds value for people or the world

Form:

- Max 32 hours a week
- Hybrid or fully remote
- When hybrid: max 1 day a week on location (<1 hour travel from Bergen)

Over-all:

- It should be an environment in which I can grow (my main goal in work)

Hourly rate:

- €90,-

Profiel

I am an energetic, positive, passionate and eager to learn person. I like challenges and I am constantly developing myself. I try to realize the things I want and make my own 'stubborn' choices. For example, after the Gymnasium I chose to go into music instead of becoming an accountant. I have been able to earn my living in this for a long time and I have also been able to fulfill all kinds of interesting jobs that have brought me further outside music. I have been able to develop as a business leader, educational developer, coordinator and program manager (director) of Conservatory (higher professional education).

In 2013 I made a radical choice in my own development, by starting my own company outside of my existing music / arts education network. First as an IT consultant, then as a custom software developer (Filemaker) and then as a web developer. In this I can use technical insight, thinking from stakeholders and end user(s) and creativity. Music has now become more of a (paid) hobby again. It remains a great passion of mine, but I would like to develop myself in new areas. I can work well together and adapt to the people around me.

In my private life I like doing fun things, visiting friends, family, concerts, theater/film, eating out, holidays, performing with one of my 2 bands, playing tennis etc. My most favorite activity is spending time with my son. I also like to follow online courses and visit Meetups. It's nice to keep developing myself as a developer.

Experience (selection)

Client	ActiefPlezier
Location	Alkmaar / Amsterdam
Period	april 2016 - now
Role	Web developer (front-end & back-end), Product owner, UX-designer, team leader
Tooling	JavaScript, TypeScript, Angular 2-15, RxJS, NgRx, Front-end architecture, NodeJS, Webpack, Angular Material, Cypress, Bootstrap, CSS3, flexbox, SASS, BEM, MongoDB, SSL, NGINX, Linux Ubuntu, PM2, REST, DigitalOcean Droplets, Jelastic, Git, GitLab SlimPay, Mollie, Google Analytics, Google Tag Manager, Google Maps etc.

Description of the work

Developing an online platform for ActiefPlezier, an organization that organizes activities for registered members. The platform consists of a public website with a private member area where members can view the activities and register for them. Members can send private messages amongst each other. They can leave comments under the planned activities. When an activity has taken place, they can post a 'story' (personal experience) and upload photos. Members can also leave comments on these posts. There is a messaging system for members (a kind of internal WhatsApp). For the paid subscriptions there is a link (REST) with SlimPay (a type of iDeal for direct debits) and Mollie (iDeal payments). The application takes care of the collection of direct debit mandates, the initiation of payment plans per member and makes it possible for members to stop direct debits or switch subscriptions (whereby the payment plan is also changed).

3 applications that support the platform

- Client application: Angular 14 application that contains public website and members area of the website. Some of the modules herein are lazy loaded to limit the initial payload and loading time. Also made extensive use of RxJS and NgRx (redux datastore), Angular Material and Bootstrap.
- Admin application: Angular 13 application that allows customer to manage the platform.
- Server application (NodeJS) that communicates with MongoDB database.

By means of separate Webpack configurations for each of the apps, they run in a local environment, on a test server and on a production server.

I basically fulfill these roles all at once: Product owner | UI/UX designer | FE developer | BE developer | DevOps

Client	Alkmaarse Gitaarschool
Location	Alkmaar
Period	2013 - now
Role	Senior front-end developer
Tooling	JavaScript, TypeScript, React.js, Next.js, Styled Components, Css Modules, CSS3, flexbox, SCSS/SASS, Git (earlier: WordPress, PHP, Bootstrap etc.)

Description of the work

Currently working on website in React.js & Next.js. Using Styled components & Tailwind css.

Client	OBI4wan
Location	Zaandam
Period	April 2019 - April 2023
Role	Senior front-end developer
Tooling	JavaScript, TypeScript, Angular (t/m 15), Preact (React), RxJs, Akita state management, Jasmine, Karma, Cypress, CSS3, flexbox, LESS, BEM, React/Preact, Azure DevOps, Git, SonarCloud, Nx, Google Analytics, Google Tag Manager

Description of the work

Developing new features / refactoring existing features (technical debt) in SCRUM development team. Worked on main product Engage (communication platform for customer contact in the broadest sense (social media / reviews / live chat / WhatsApp, etc.) and chat widget. Language: English. Worked a lot with international (out-sourced) developers. Had a leading role in the team. During my period here the company moved from startup phase top scale-up phase. So a lot of my work was related to maturing the solutions and the team/processes. Over time the teams became self-steering and fully responsible for their parts of applications. It was I process I learned a lot from and it made me stay there for these years.

Project	NRC Media
Location	Amsterdam
Period	January 2019 - February 2019
Role	Senior front-end developer
Tooling	JavaScript, TypeScript, CSS3, flexbox, CSS animations SASS, BEM, jQuery, Python, Jinja2, Git, GitHub

Description of the work

Developing fancy landing page for re-release of product and marketing purposes (<https://www.nrc.nl/het-blad/>) (by now the page has been replaced). Developing 'featured items bar' for header homepage NRC including fetching and displaying weather info from external API.

Project	Incentro / Yarden
Location	Almere
Period	April 2018 - November 2018
Role	Senior front-end developer
Tooling	JavaScript, TypeScript, Angular 2 & 4, Jasmine, Karma, RxJS, NgRx & Angular-redux state management, CSS3, SASS, flexbox, CSS animations, BEM, Git, Bitbucket, Jenkins, Jira, Confluence

Description of the work

Senior front-end developer in Incentro scrum team for end customer Yarden, 32 hours a week. Scrum team still contained 2 FE developers (1 junior and 1 medior). Products developed: Virtual Assistant (Angular 4 application with NgRx and RxJs communicating with Digital CX backend), Sales Funnel ((Angular 4 application with NgRx and RxJs communicating with REST API) and FAQ page (custom JavaScript application with Gulp communicating with Digital CX backend) Further development My Environment (My Yarden) (Angular 4 application with angular-redux and RxJs communicating with REST API) Writing unit tests (Jasmine/Karma).

Project	Dokters van de Wereld
Location	Alkmaar / Amsterdam
Period	February 2017 - September 2017
Role	IT consultant
Tooling	OpenMRS

Description of the work

Dokters van de Wereld ('Doctors of the World') (NGO) was looking for a database solution for one of their international projects. I have been approached to guide them in this. I mapped out the requirements and wishes with them, researched existing solutions, interviewed suppliers and other stakeholders and issued advice. The final choice fell on an open source solution OpenMRS. After that I also guided them in the first phase of implementation. The project was then put on hold for financial reasons to be resumed at a later time when funding is available.

Project	AAA Design Media
Location	Alkmaar / West-Grafdijk
Period	September 2013 - now
Role	Filemaker Programmeur / Web developer (front-end & back-end)
Tooling	Filemaker, PHP, MySQL, HTML, CSS, Wordpress, JavaScript

Description of the work

For this client I developed an ERP system (custom software with FileMaker) in which many administrative processes are automated. As a result, the customer has been able to double its turnover with the same resources. For the customers of AAA Design Media I have built an online portal from which they can approve orders and products. I have provided the solution with a SEPA-XML export module with which the customer can generate XML files (to be uploaded at the bank) with 1 push of the button, with which he can collect his income from his customers. The system also creates order confirmations, invoices, multi-year contracts, etc. All automatically and emails them with intelligently generated email texts to customers, so that AAA Design Media can fully focus on sales and making their end products.

I also made two websites for two products from Theaterwijzer (theaterwijzers.nl) and QuePasa (QuePasaNL.com) in which advertisements from customers of AAA Design Media rotate. For this I have developed 2 custom WordPress templates, so that the content is easy to manage and is automatically placed in the right places.

Project	Kunsthandel Ineke Aronds
Location	Alkmaar / Bergen
Period	May 2016 - now
Role	Web developer (front-end & back-end)
Tooling	Wordpress, HTML, CSS3, JavaScript

Description of the work

Website for Kunsthandel InekeAronds.nl: The wish was to create an outdated website in a new house style with an existing WordPress template, so that the customer can manage it himself. The customer ultimately made the choice

for a template and I took care of building in the corporate identity and custom pages. Also worked out a workflow that would allow the owner to place a huge collection of art online. Created Excel to support this, which then produces code that the owner can include in certain places.

Also developed a custom website 'BeschermtHetDuin.nl' created (HTML/CSS/Bootstrap). One-pager website with a social purpose.

Project	Team Klijnsma
Location	Wormer
Period	March 2015 - December 2016
Role	IT consultant / front-end web developer
Tooling	Box cloudservice / MacOS / HTML / CSS3 / JavaScript

Description of the work

Guidance processes in which data from Team Klijnsma (communication agency) and customers were migrated to the Cloud platform. Conducted research into various options, issued advice, provided implementation, devised workflows/method and provided instructions to all employees involved.

In addition, separate support in the field of web development was provided. Do troubleshooting for customer websites. Writing JavaScript and or CSS solutions to make wishes possible.

Project	Global Projects Consult
Location	Alkmaar
Period	November 2015 - August 2016
Role	FileMaker developer consultant
Tooling	Filemaker, HTML, CSS

Description of the work

Provided support for Global Projects Consult's largest client: Den Helder Stores BV. DHS BV is an internationally operating food and non-food supplier for the maritime sector and runs entirely on custom software from GPC (FileMaker). In order to maintain innovations in existing links with third-party systems (suppliers and end customers), I have written XSLT stylesheets for the correct export and import of XML files. I have also been a backup technical support and I have supervised an update for the customer.

Also developed a custom website (HTML/CSS/Bootstrap) globalprojectsconsult.com made for GPC.

Work experience before 2013 in summary

Program manager Conservatory HBO Alkmaar & Haarlem

Performing musician (guitarist), music teacher, coordinator Music Education-department of Conservatory, educational developer, arranger, musical leader, business leader etcetera.
